STRIMZI

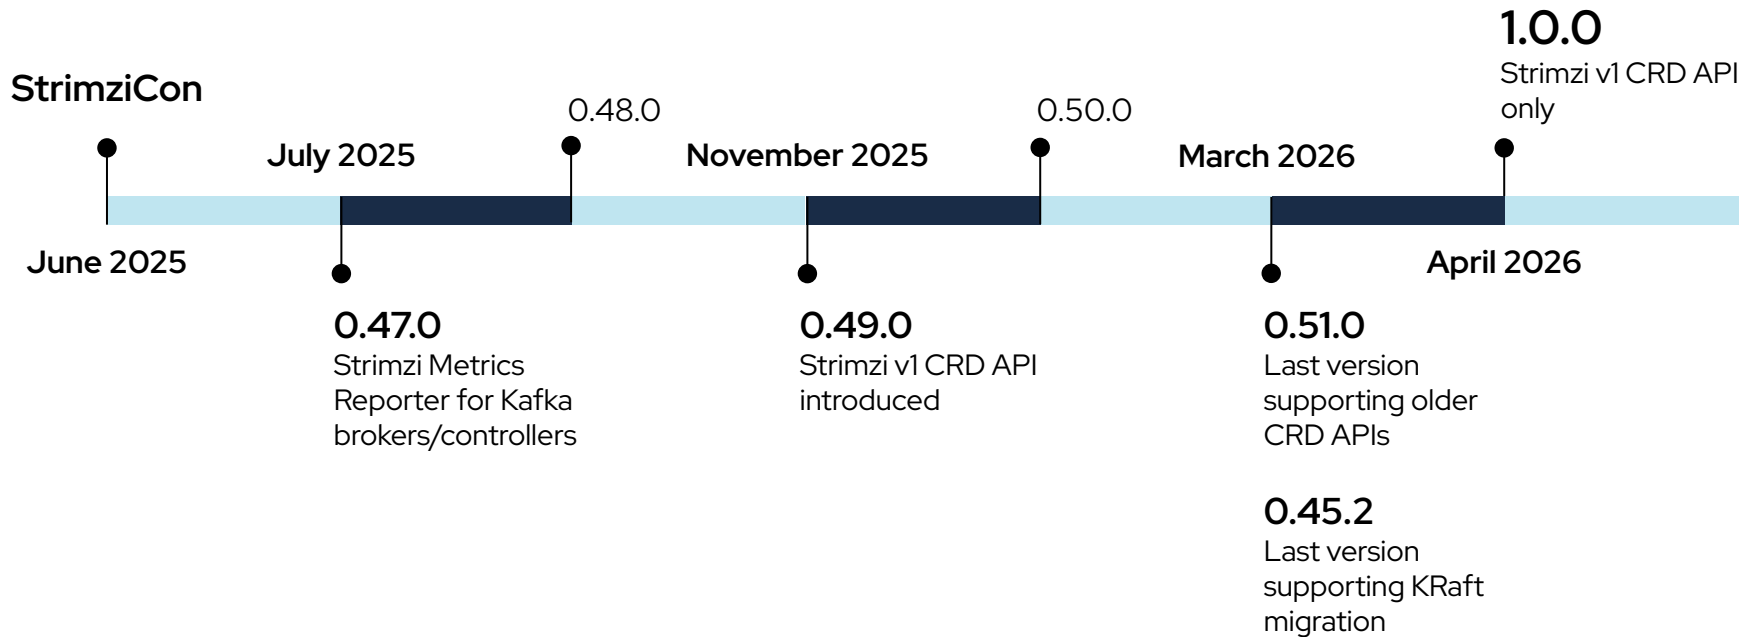

Simplifies the process of running Apache Kafka on Kubernetes

Secure by Default

Simple yet **Configurable**

Kubernetes-Native Experience

In the past year ...

Why has 1.0.0 taken us so long?

Strimzi users

Strimzi vendors

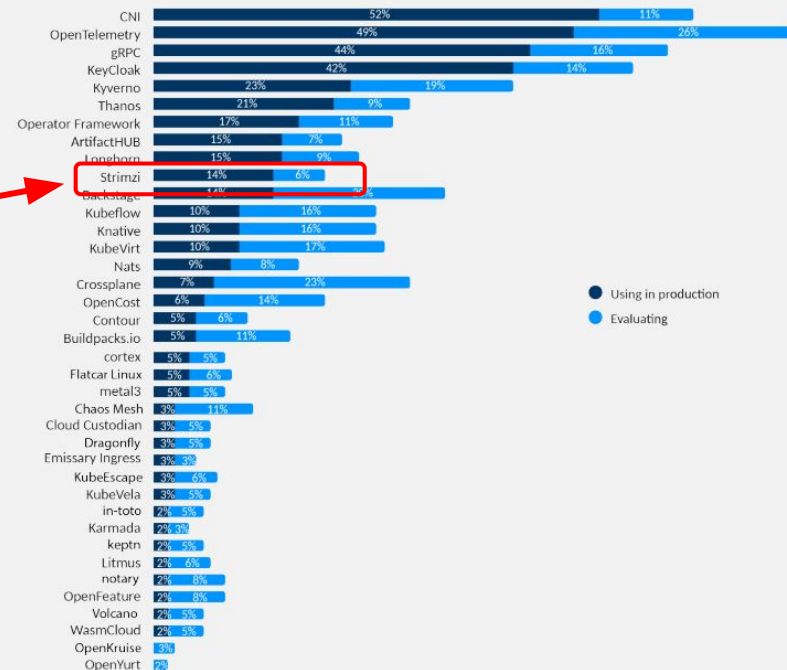

FIGURE 20

CNCF INCUBATING PROJECTS

Which of these incubating CNCF projects is your organization using in production or evaluating? (select one)

2025 CNCF Annual Survey, Q33, Sample size = 395-502, DKNS excluded

Why has 1.0.0 taken us so long?

KIP-500 for Apache ZooKeeper removal introduced in **2019**

Apache Kafka 4.0 with KRaft only support released in **2025**

Why has 1.0.0 taken us so long?

KIP-500 for Apache ZooKeeper removal introduced in **2019**

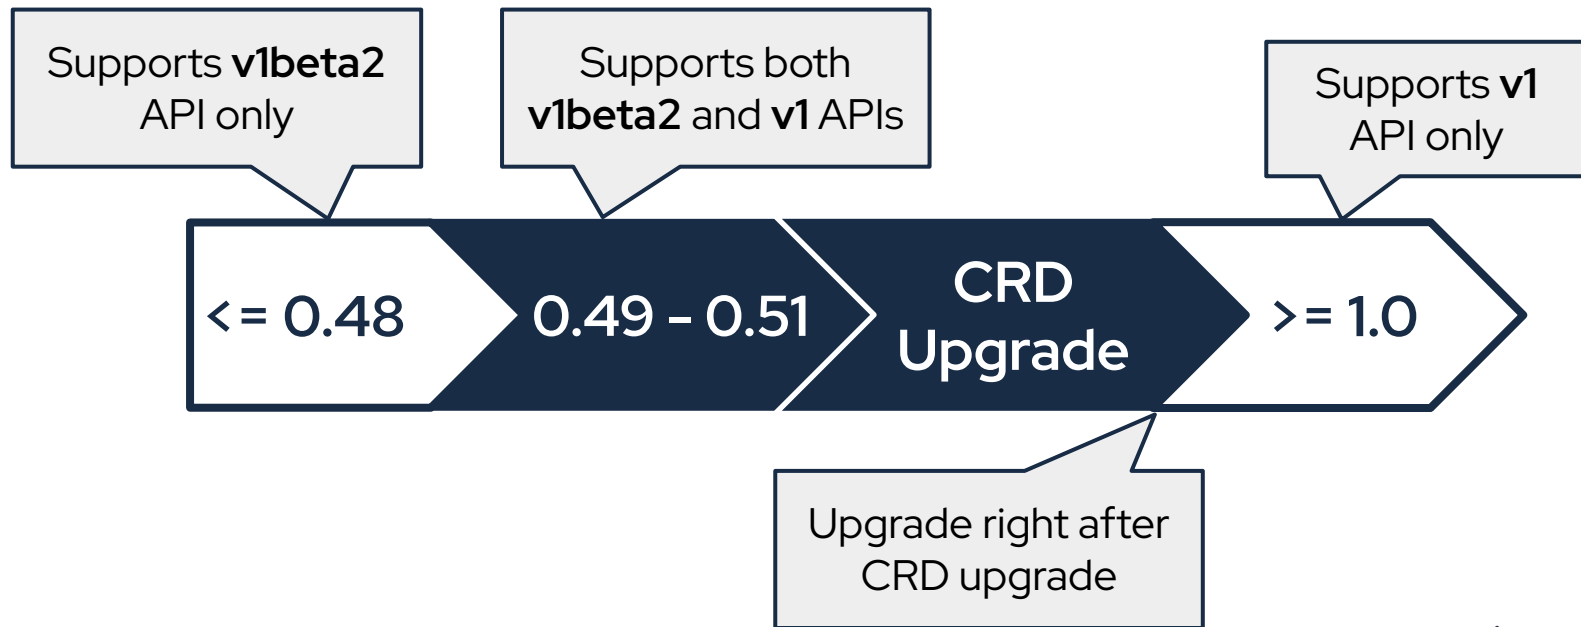

Apache Kafka 4.0 with KRaft only support released in **2025**

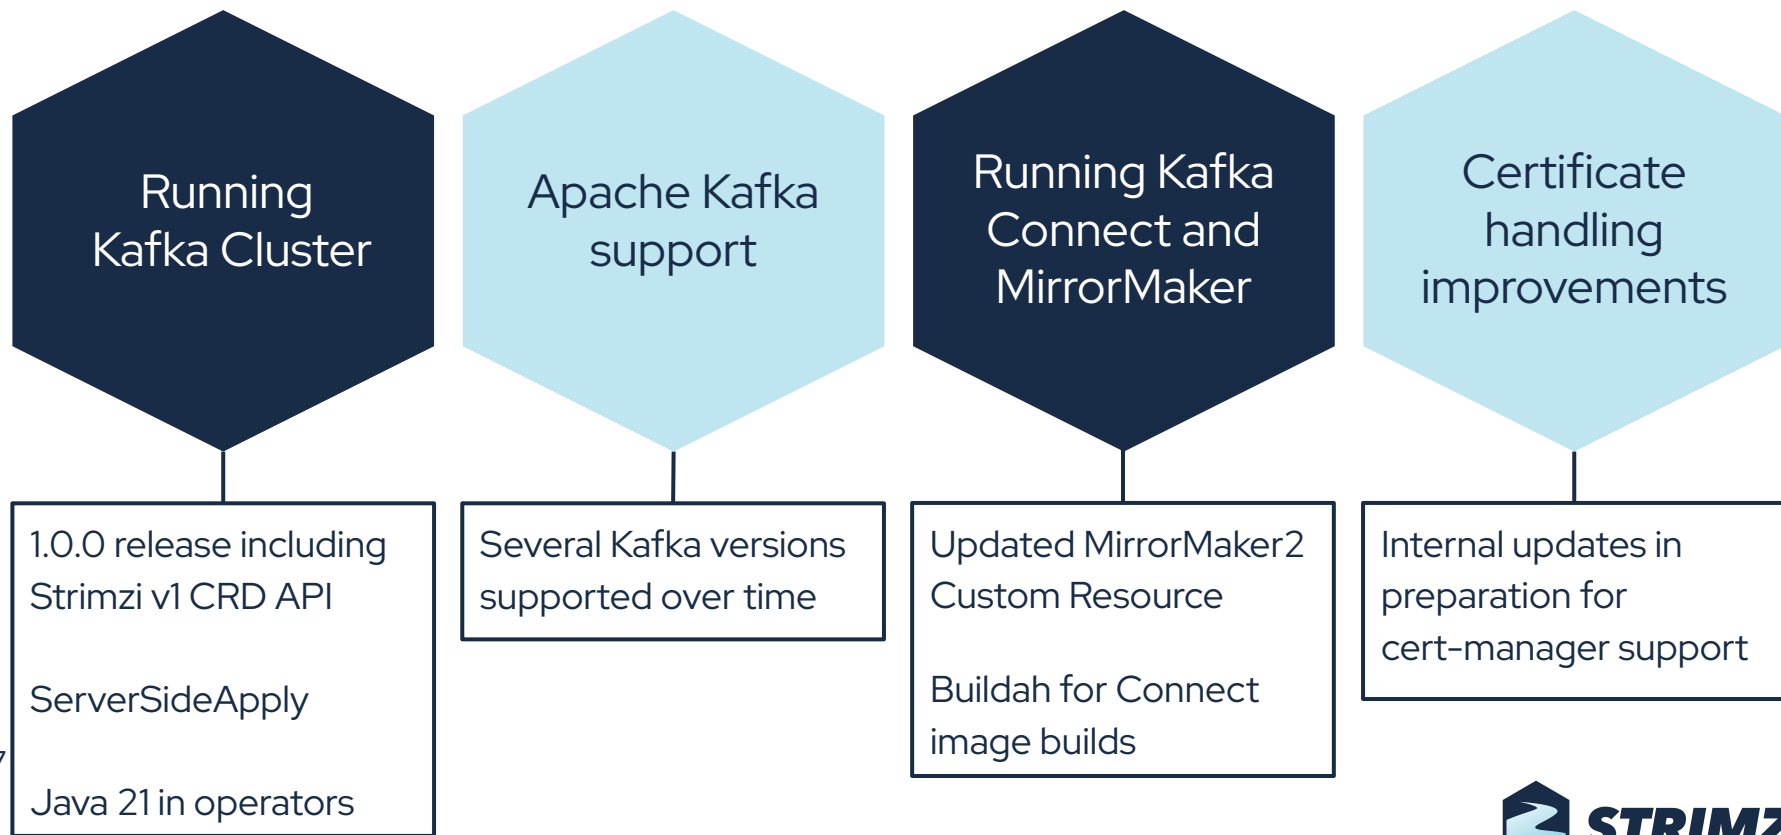

Strimzi v1 CRD API

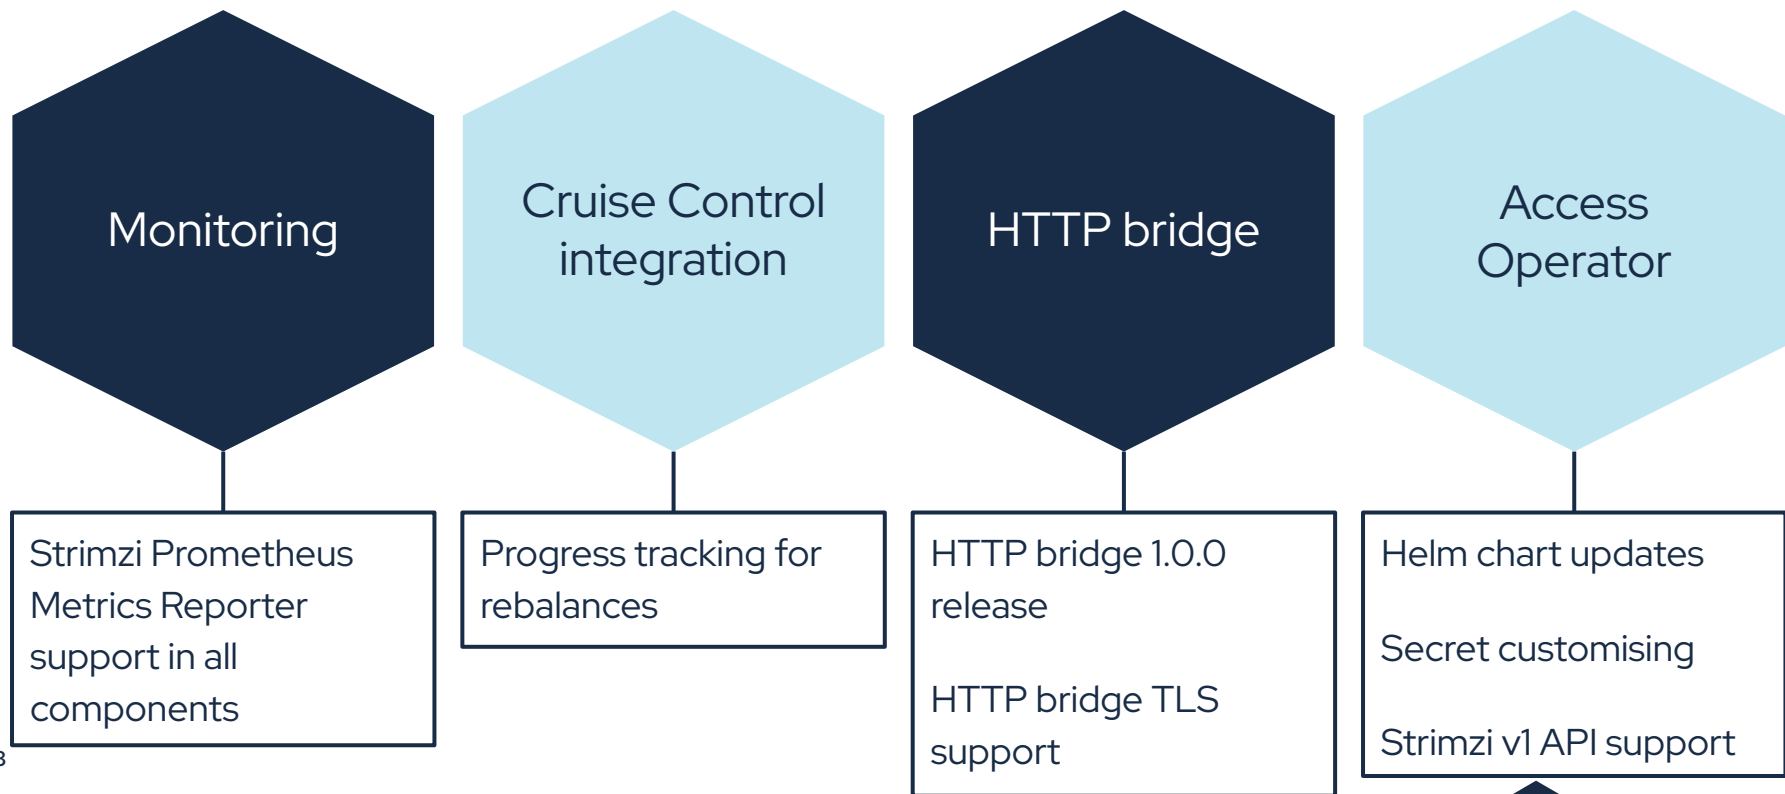

Strimzi v1 CRD API

- API Cleanup
- Redesign of MirrorMaker2 CR

v1 CRD API

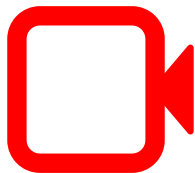

... the future!*

* we hope

Community updates

New ways to keep up with the Strimzi community...

[Conference playlist on
Strimzi YouTube](#)

[Awesome Strimzi
repo](#)

Strimzi **embraces AI tools** but ... “With great power comes great responsibility”

You own the
generated code

You
understand it

You disclose it in
your contribution

Maintainers
time to review
is valuable

Strimzi preparation ... from incubating to ... graduation

**Vendor
neutrality**
matters

Clear
governance
and **community**
involvement

Security as
first-class goal

Wider
ecosystem
adoption and
production
readiness

What can you do to help?

STRIMZICON

In collaboration
with

CLOUD NATIVE
COMPUTING FOUNDATION

Time (GMT+2)	Session	Speaker
14:25 - 14:55	Beyond the Install: Take full ownership of your Strimzi cluster	<i>Jakub Scholz @ Cloudera</i>
15:00 - 15:30	Who Are You? Configuring Kafka Authentication in Strimzi from TLS to Custom Principals	<i>Daniel Mulder @ Axual</i>
15:35 - 16:05	Swapping the Engine Mid-Flight: How We Moved Reddit's Petabyte Scale Kafka Fleet to Kubernetes	<i>Sky Kistler @ Reddit</i>
16:10 - 16:40	Building Strimzi MCP Server for Kubernetes: Democratizing Platform Expertise Through LLMs	<i>David Kornel, Jakub Stejskal @ IBM</i>
16:45 - 17:15	From Running to Operating: Real-World Strimzi in Production	<i>Rajith Attapattu @ Randoli</i>
17:20 - 17:50	Disaster Recovery in action with Kafka and Strimzi	<i>Mickael Maison, Gantigmaa Selenge @ IBM</i>
17:50 - 18:00	Closing	<i>Kate Stanley & Paolo Patierno @ IBM</i>

KafkaConnect integration

Rolling updates

What's your favourite Strimzi feature?

Node Pools

Something gone... the
ZooKeeper to KRaft
migration

Volume mounts

KRaft mode

KafkaRoller v2

cert-manager integration

What's a future Strimzi feature
you're excited about?

A proposal that hasn't been
opened yet!

Scaling controller nodes

Gatekeeper plugin mechanism

Server Side Apply

Volume mounts

What feature is
underappreciated or under-used?

Drain cleaner

Connector offset
management via
KafkaConnector CR

Auto-rebalancing on
scaling

System tests

Go to social media and give
Strimzi a shoutout!

Contribute

If everyone attending did one thing
after today what should it be?

Try Strimzi and see what it
has to offer

Up-vote an issue for a
feature you care about

Don't get discouraged, reach out to maintainers to see how your feature can be added

Be consistent with contributions

Start small and reach out to the community for help

What advice would you give new contributors who want to become a maintainer?

Show your interest by contributing to it, but not just for the sake of opening PRs (by using AI)

Find an intrinsic motivation, don't just look for good starts

Tackle small issues one-by-one

Feel free to ask questions

Strimzi rulez!

Anything else you want to share?

It just works!
